	<ol style="list-style-type: none"><li>1. Accessibility surveys for the Public Service Center parking garage, exterior accessible routes and the Juvenile Justice Center were approved with some minor changes. Suggestion that “pony walls” be built around drinking fountains that protrude from walls of Juvenile Justice Center.</li><li>2. Recommend that grates in streets on South side of the Public Service Center be guarded by ½ grate openings as opposed to 1”. Though the grates may not be directly in the accessible pathway, a level sidewalk and street platform pose potential risks for individuals in wheelchairs that may get their wheels stuck in the grate.</li><li>3. Tim McVicker advised the group that the area on the south side of the Public Service Center was re-examined by staff of Community Development and Facilities Management. Costs estimates will be provided regarding two types of protective walls or rails that would prevent individuals from crossing 13<sup>th</sup> street except in designated pedestrian crosswalks. Also, it was noted that handrails need to be installed anywhere there is a two step rise in elevation. Truncated domes will be installed as required.</li></ol>
